

As an organization working to advance leadership in sustainable seafood FishWise is pleased to endorse the GDST Standards and Guidelines for Interoperable Seafood Traceability Systems, Version 1.0. For many years, FishWise has worked with companies to implement seafood traceability best practices, and we see industry adoption of the GDST 1.0 standards as a significant milestone in that effort. We believe these standards will encourage broader adoption of interoperable traceability tools, and facilitate more robust verification of seafood origin. Moving forward, we are eager to see GDST expand its coverage to encompass social responsibility data, particularly those KDEs supporting strong human and labor rights initiatives.

A handwritten signature in black ink that reads "Tobias Aguirre".
