

GLOBAL DIALOGUE on Seafood Traceability

This KDE checklist for **aquaculture products on the next page** is part of the GDST Supplier Onboarding Packet (SOP) and is intended for exclusive use by GDST members and their supply chain partners. If you have received this checklist, one of your partners (a GDST member) is utilizing this SOP resource to communicate immediate and short-term GDST onboarding requirements and should have completed it by checking the appropriate boxes. Specifically, you are being asked to adopt certain GDST Key Data Elements (KDEs) before specified periods of time to facilitate a gradual adoption of all KDEs over six months. Please refer to the presentation included in the SOP for more information on this resource. Note: There is a separate version for wild-caught products.

KDE Checklist - Aquaculture			
KDE Name	KDEs Required Immediately	Additional KDEs Required in Days	Additional KDEs Required in Days
TRACEABLE OBJECT INFORMATION			
Species			
Item / SKU / UPC / GTIN			
Linking KDE (batch, lot, serial number)			
Weight / Quantity
